CAREER OBJECTIVE

Motivated third-year Computer Science Engineering student with a strong foundation in programming, data structures, and full-stack development, and a growing focus on machine learning and AI-driven applications. Seeking opportunities to apply technical and problem-solving skills to real-world projects, deepen ML expertise, and gain industry experience.

EDUCATION

B.Tech in Computer Science and Engineering 2024 – 2028 (Expected)

Vignan's Foundation for Science, Technology and Research | CGPA: 8.15 / 10

Intermediate (12th Grade) 2022 – 2024

Sri Chaitanya Junior College, Tenali | Percentage: 80.3%

SSC (10th Grade) 2021 – 2022

Sri Chaitanya School, Tenali | Percentage: 93.8%

TECHNICAL SKILLS

- **Programming Languages:** C, Python, Java, DSA,os
- **Web Technologies:** HTML, CSS, JavaScript, MERN Stack (MongoDB, Express, React, Node.js), Frontend Application Development
- **Databases:** MySQL, MongoDB (Compass & Shell), Firebase
- **Tools & Platforms:** VS Code, Git/GitHub, Linux (Ubuntu)
- **Areas of Interest:** Machine Learning, Artificial Intelligence, AI Agents & LLM Integration
- **Apis:**openai,gemeni
- **Ui&ux:**figma
-

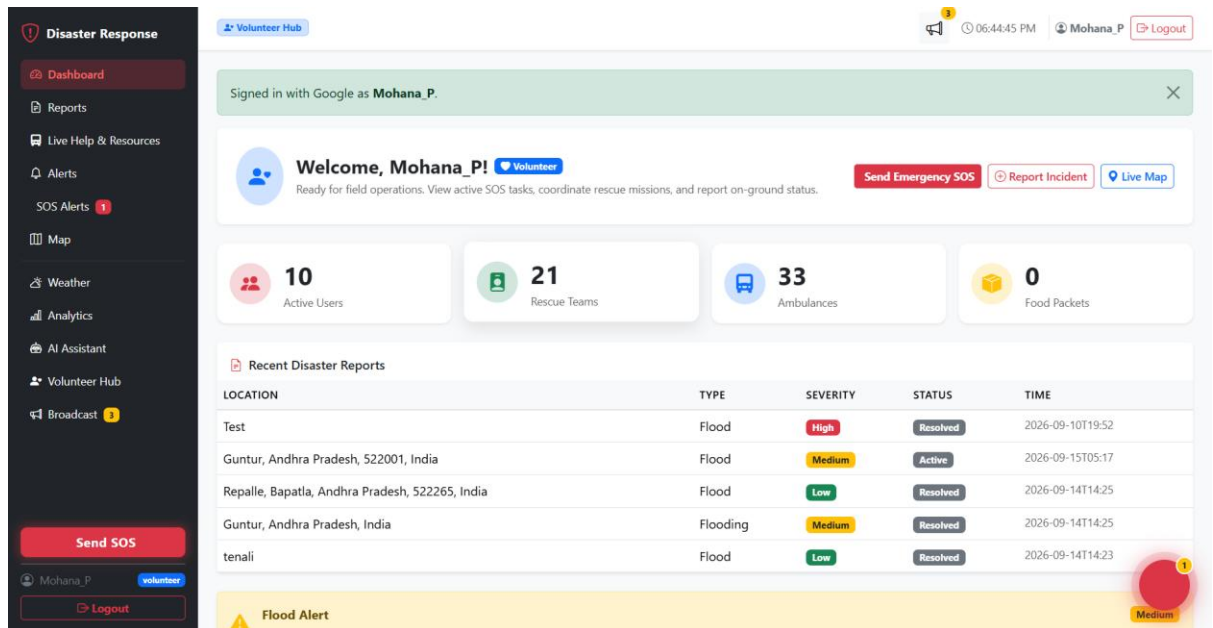

Projects:

Autonomous Disaster Response Coordination System Flask | MongoDB | Groq Llama 3

- Developed an AI-powered disaster management platform for real-time disaster analysis and response, featuring AI agents for severity assessment, resource allocation, and route optimization.
- Integrated WhatsApp SOS alerts, live weather monitoring, interactive maps, and a bilingual (English/Telugu) AI chatbot, with OTP-based two-factor authentication and an admin analytics dashboard.

Github link:- <https://github.com/purammohanasrija-arch/Autonomous-Disaster-Response-Coordination-System>

Deploy:- <https://disaster-response-system-rta2.onrender.com/login>

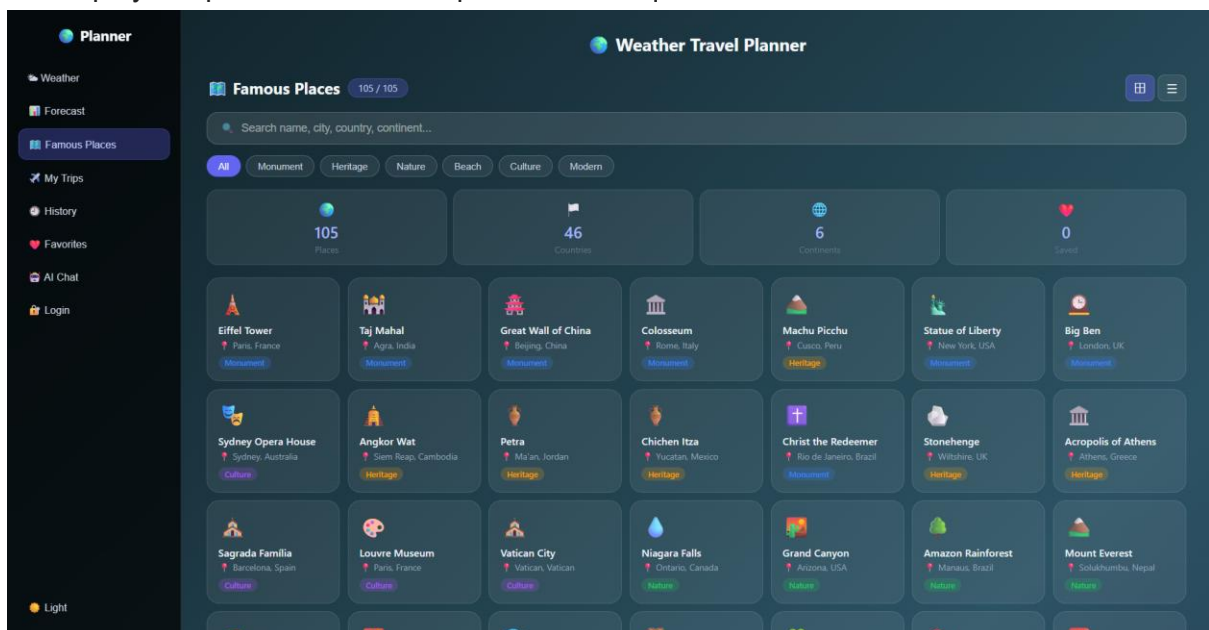

Weather Travel Planner – Full Stack Web Application

MERN Stack (MongoDB, Express, React, Node.js)

- Built a full-stack travel planning application with live weather lookup by city or GPS and a 5-day forecast visualized using Recharts.
- Implemented secure authentication using JWT and bcrypt, with a trip planner module supporting budget calculation and CRUD-based trip storage in MongoDB.
- Developed an AI-powered travel chatbot using the OpenAI API covering 105+ global landmarks, and built a responsive React UI with Framer Motion animations, dark mode, and search history.

Github:- <https://github.com/purammohanasrija-arch/Weather-Travel-Planner-/tree/main/Weather-Travel-Planner>

Deploy:- <https://weather-travel-planner-client-qmsi.onrender.com/>

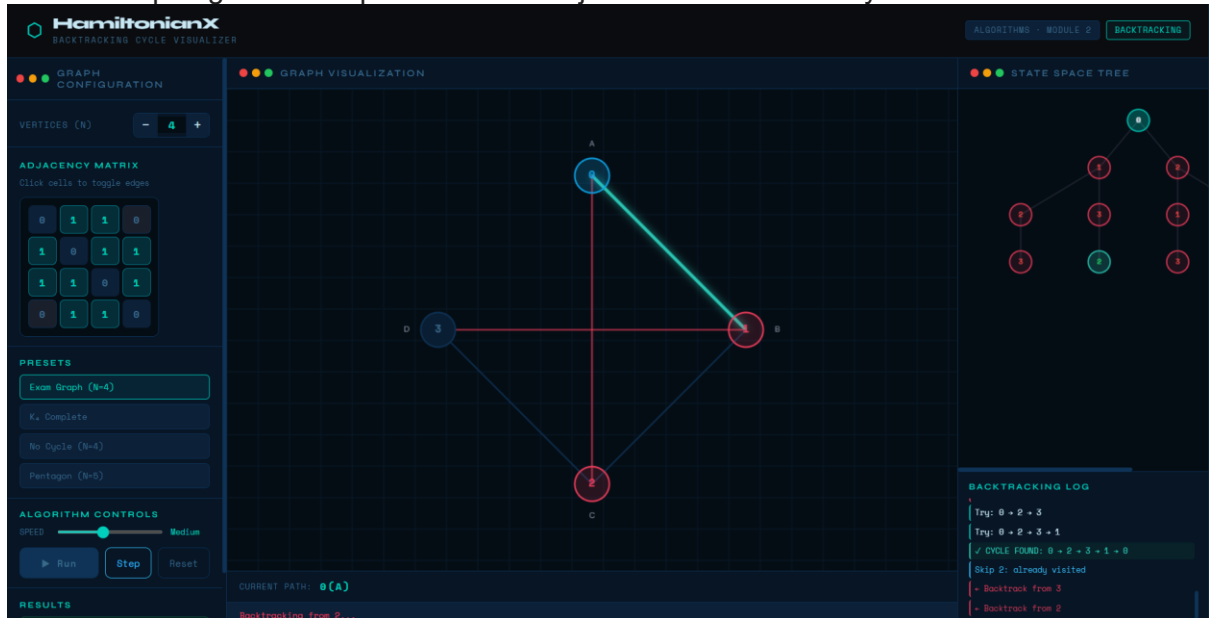

Hamiltonian Cycle Backtracking Visualizer

HTML | CSS | JavaScript

- Developed an interactive web application visualizing the Hamiltonian Cycle problem using backtracking, with live graph rendering, a dynamic adjacency matrix, and a state-space tree.
- Added animation controls, adjustable speed, step-by-step execution logs, and graph presets to support algorithm analysis in a responsive UI.

Deploy link:- <https://hamiltonian-cycle.onrender.com>

Github:- <https://github.com/purammohanasrija-arch/Hamiltonian-Cycle>

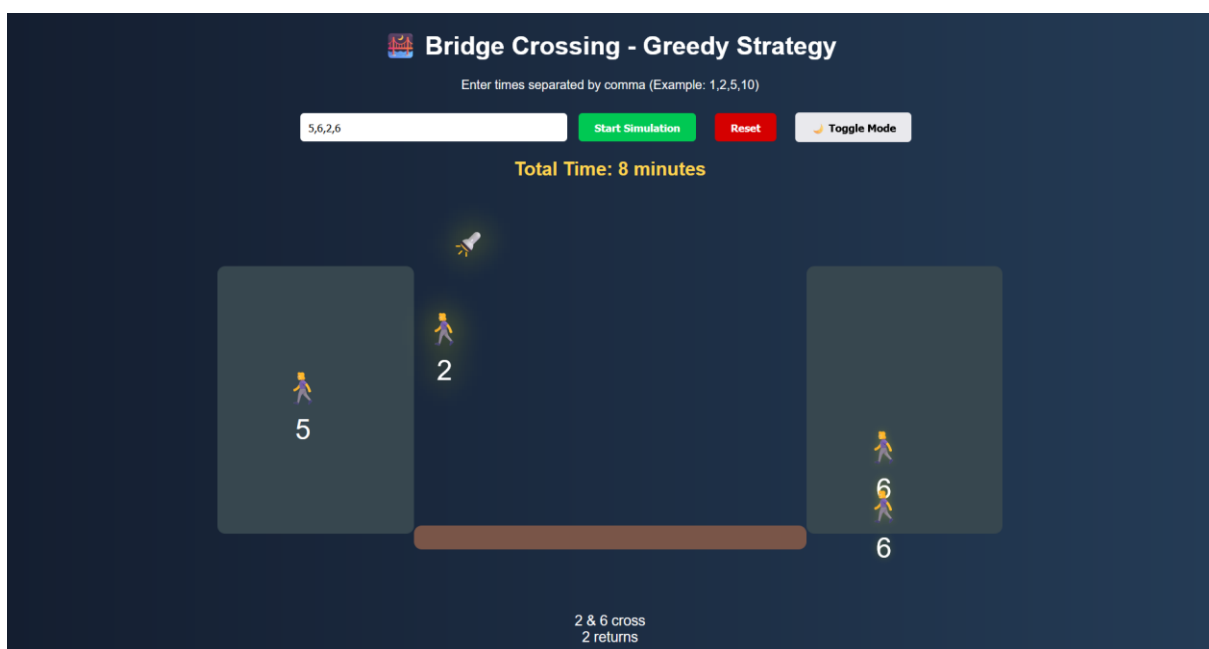

Bridge Crossing Problem Visualizer (Greedy Algorithm)

HTML | CSS | JavaScript

- Built an interactive simulation of the Bridge Crossing problem using a greedy strategy, with real-time animations, timer tracking, and movement logs.
- Added dark/light mode, sound effects, and step-by-step visualization for an enhanced learning experience.

Github:- <https://github.com/purammohanasrija-arch/Bridge-Crossing>

INTERNSHIP EXPERIENCE

Software Development Intern

CodeAlpha(App Development Internship)

- **Fitness Tracker App** (*Python, Flask, SQLite*): Built a fitness dashboard with progress tracking, goals, and workout visualizations.
- **Language Learning App** (*Python, Flask, Firebase*): Developed a learning platform with flashcards, quizzes, and progress tracking.
- **Smart Flashcard Learning Hub** (*HTML, CSS, JavaScript*): Created an interactive flashcard app with animations, CRUD, categories, and localStorage.

Certificate should be stored:

Prodigy InfoTech Internship (Full-Stack Web Development):-

- **Task 01: Responsive Landing Page** — Build a landing page with a fixed, interactive navigation menu that changes style on scroll or hover using HTML, CSS, and JavaScript.
- **Task 02: Stopwatch Web Application** — Create a stopwatch app featuring start, pause, reset, and lap time tracking functions using HTML, CSS, and JavaScript.
- **Task 03: Tic-Tac-Toe Web Application** — Develop an interactive Tic-Tac-Toe game supporting player-versus-player or player-versus-AI modes with win-checking logic.
- **Task 04: Personal Portfolio Website** — Design a portfolio site showcasing skills, projects, an "About Me" section, background, education, and experience.
- **Task 05: Weather App** — Build a web page that fetches and displays current weather conditions and temperature from a weather API based on user location.

Certificate should be stored:
